Training on Climate Resilient Water Management Practices for Indigenous Women

1. Background

The purpose of this Terms of Reference (ToR) is to outline the requirements for hiring a resource person to conduct a Training for Trainers (TOT) program aimed at empowering indigenous women with knowledge and skills in climate resilient water management practices under the project “Promoting CLimAte ReSilient and Socially Inclusive Water Management in the Lower Karnali Watershed Region, Nepal (CLASSIK).” The CLASSIK is a joint project led by The Small Earth Nepal (SEN) in the partnership with Tharu Women Upliftment Center (TWUC), Central Department of Geology and Central Department of Sociology, Tribhuvan University and Karnali Integrated Rural Development & Research Center (KIRDARC).

This project aims to address the challenges faced by the Lower Karnali Watershed Region (LKWR) in Nepal to sustainably conserve and manage the available water resources for food security, economic prosperity and social transformation. The LKWR is subject to significant spatial and temporal variations in water resources, resulting in both water scarcity and excessive water availability, exacerbated by the impact of climate change. Groundwater depletion leading to lack of water for household and agricultural uses, loss of biodiversity, and degradation of water ecosystems are major concerns within the region. Furthermore, indigenous communities, particularly women, heavily depend on natural ecosystems for their livelihoods and are hard hit by the impact of climate change yet they are often excluded from decision-making processes, and their traditional knowledge and practices are disregarded. Hence, this training has been envisioned as a step to enhance the capacity of indigenous women towards contributing in sustainable water management.

2. Objective of the assignment

The main objective of the task is to train women specially from indigenous community (Tharu, Magar, Sonaha) representing from municipalities, wards, community groups, water users’ associations, on Climate Resilient Water Management Practices contributing to enhance the capacity of women on sustainable and integrated water management efforts within their communities.

3. Scope of Work

In close consultation with Tharu Women Upliftment Center (TWUC) and project partners, the resource person will be responsible, but not limited to the following activities:

- a. Training will be given to 20 participants who will be further give training to 120 women in the community.
- b. Review of existing training and resource materials relevant to this training
- c. Develop a comprehensive training curriculum that covers climate resilient water management practices, including but not limited to water conservation, harvesting, and sustainable usage, leadership in water management
- d. Design the training program
- e. Deliver the training sessions in a manner that is engaging, participatory, and culturally sensitive.
- f. Provide practical demonstrations and hands-on activities to enhance learning and retention.
- g. Assess the learning outcomes and providing feedback to participants and organizers.
- h. Prepare and distribute training materials, including manuals, handouts, and other relevant resources.
- i. Conduct a training evaluation survey for assessing the effectiveness of the training provided (pre and post survey questionnaires/checklists)

4. Qualifications and Experience

The resource person should have: -

- a. A minimum of a Master’s degree in environmental science, water resource management, or a related field.
- b. At least 5 years of experience in designing and conducting training and capacity building, with a focus on climate resilience and water management.
- c. Proven experience working with indigenous communities and a deep understanding of their cultural contexts.

- d. Excellent communication and facilitation skills, with the ability to adapt training methods to diverse learning styles.
- e. Clear understanding in the local language(s) spoken by the indigenous women participants.

5. Duration and Location

The total expected duration of this consultancy service will be 30 days including TOT of 6 days from the period the task is initiated. The resource person must be available to travel to the indigenous communities where the training will be conducted. The training will be conducted at Bardiya district.

6. Deliverables

S.n.	Deliverables	Time line
1.	A clear and concise concept note with clear training methodologies, session plan, duration/time, etc.	Within a week of agreement
2.	Drafting and finalizing a training manual based on the approved concept note and incorporating the feedback of team including TWUC, SEN and IHE	Within two weeks of agreement
3.	A 6-days training to 20 participants	6 days
4.	A final report summarizing the training outcomes, participant feedback, results from evaluation survey and recommendations for future training.	Within 15 days of completion of program

7. **Reporting and Coordination:** The consultant will submit report to TWUC and maintain regular communication with TWUC throughout the duration of the assignment. S/he might need to coordinate with the local government and relevant stakeholders too.

8. Remuneration

The resource person will be compensated according to the agreed-upon fee within the line of the budget.

9. Contact Information
